

QUIZ: MOUNTING

BY ANNE VAZQUEZ

Match the following mounting terms with the choices below.

1. Adhesive ____

2. Edge Strips ____

3. Diaphragm ____

4. Dry Mounting ____

5. Platen ____

6. Pressure-Sensitive Mounting ____

7. Release Board ____

8. Substrate ____

9. Tissue ____

10. Vacuum Mounting ____

-
- A. Adhesives that adhere on contact and bond under pressure.
 - B. Process of bonding an item to a substrate using pressure and heat-activated adhesives.
 - C. Bonding agent that holds two surfaces together.
 - D. Process that uses the suction of a mechanical vacuum to create pressure to achieve mounting.
 - E. Method used in conservation mounting to allow the bond to be reversed, if desired.
 - F. Board coated with an adhesive-resistant paper or film which is used to protect artwork from unwanted adhesive transfer.
 - G. Thin sheets of adhesive-coated paper that are activated by heat.
 - H. The metal or glass underside of the lid on a mounting press which provides a smooth surface for a mounting package.
 - I. Flexible rubber part of a vacuum press which molds itself around the substrate, conforming to the mounting package.
 - J. Underlying support that the artwork is attached to in the mounting process.

Answers: 1. C 2. E 3. I 4. B 5. H 6. A 7. F 8. J 9. G 10. D
